

Angel Galindo Joins Triad Magnetics as Territory Manager for Sales Department

Engineering Professional Brings Deep Technical Expertise and Process Optimization Experience

Perris, CA—July 1, 2025—Triad Magnetics is pleased to announce that Angel Galindo has joined the company as a Territory Manager. With a strong background in software engineering, enterprise resource planning (ERP) solutions, and business process optimization, Galindo brings a unique blend of technical acumen and operational insight to this critical sales and customer-facing role.

Galindo's career spans over two decades in engineering and production positions, including software development, team leadership, and cross-functional project management at companies such as Collins Aerospace and Cintas Corporation. He has consistently demonstrated the ability to assess current systems, identify improvement opportunities, and implement custom-built solutions that streamline operations and increase efficiency.

"Angel's rare combination of hands-on engineering experience and business process strategy will add tremendous value to both our internal teams and our customers," said Bill Dull, President of Triad Magnetics. "His ability to translate technical complexity into clear, actionable insights will strengthen how we deliver service, support, and solutions across his territory."

Ongela Starks, Sales Manager at Triad, commented: "I'm thrilled to welcome Angel to the sales team! While new to the electronics industry, he brings the right skill set to engage effectively with reps, customers, and distributors. Angel is proactive, eager to promote Triad products, and collaborates seamlessly with the team."

Galindo will take over management of sales accounts covering Triad's west coast U.S. territories including WA, OR, MT, ID, CA, and NV. He will also oversee Mexico & South America and have corporate responsibility for several key National and Global distribution accounts.

Starks adds: "What excites me most is his role in expanding our presence in Latin American electronic sales. Just as selling into Europe or China requires cultural awareness, Latin America presents unique opportunities that demand local expertise. Angel is bilingual in Spanish and English, and with his cultural understanding of the region and the support of our Latin American rep, I'm confident we'll unlock doors that have remained closed in the past."

Galindo earned his Bachelor of Science degree in Computer Science from Universidad Autónoma de Baja California in Mexico. He has lived in Southern California's Inland Empire for more than a decade, where his interests extend well beyond engineering and sales. Galindo worked as a personal trainer for many years and continues to prioritize a healthy, active lifestyle to this day. He also has a deep appreciation for the arts; an accomplished ballroom dancer, he plays both guitar and piano, and lends his voice to his church choir where he channels his love of music into a meaningful connection with his community.

Says Angel, "I'm proud to join the Triad team and look forward to combining my technical experience with a customer-first mindset. I'm excited to make a positive impact, as we work together to grow and strengthen Triad's successes in both the U.S. and Latin America."

Triad Magnetics

For more than 80 years, Triad Magnetics has been a global leader in the design and manufacture of transformers, power supplies and inductors for a wide range of applications, including switch mode/high frequency, wall plug-in, power transformers, inductors and audio transformers. Triad's custom manufacturing facility in Perris, CA, offers a USA-based manufacturing option. In addition, most of Triad's standard products are produced in the Philippines, providing a low-tariff manufacturing and distribution channel.
