

Jose Briceno Joins Triad Magnetics as QMS Manager

Quality Professional Brings Over 20 Years of Expertise in ISO 9001, AS9100, Auditing, and Continuous Improvement to Lead Triad's QA Department

Perris, CA—October 8, 2026—Triad Magnetics is pleased to announce that Jose Briceno has joined the company as QMS (Quality Management Systems) Manager. With more than two decades of experience working under ISO 9001-based quality systems and 10 years serving as a Quality Manager, Briceno brings extensive expertise in manufacturing, compliance, auditing, corrective action, and continuous improvement to his new role leading Triad's Quality Assurance department.

Briceno has a proven track record leading and managing Quality Management Systems in manufacturing and distribution environments, most recently supporting the aerospace and automotive industries. As a Quality Manager, he has created, implemented, and maintained QMS programs in accordance with ISO 9001:2015 and AS9120 standards, while serving as a Management Representative and Lead Auditor for companies like RJE International and Wieland Metal Services. His previous responsibilities have included planning and conducting internal audits, preparing for and supporting FAA and external ISO audits, identifying process gaps, and ensuring corrective actions are effectively implemented and documented. He is certified as an ISO 9001:2015 and AS9100D/AS9120B Lead Auditor.

A strong leader and communicator, Briceno has extensive experience working with management teams and cross-functional groups to drive quality objectives and continuous improvement. His expertise includes root cause analysis, corrective and preventive action, audit reporting, supplier quality, compliance, and quality performance monitoring. He brings a hands-on, process-focused approach to quality management, with the ability to translate audit findings and quality data into actionable improvements while maintaining compliance with customer and industry requirements.

"We're excited to have Jose bring his level of experience to our Quality Department," said Bill Dull, President of Triad Magnetics. "As a member of Triad's Executive Leadership Team, Jose will help ensure that every Triad facility and product continues to meet our rigorous quality standards."

Before beginning his career in quality, Briceno served in the United States Army as an Electrical Generation Equipment Repair specialist, where he maintained power generators and diesel engines and performed electrical troubleshooting using technical manuals and wiring diagrams. He is bilingual in English and Spanish, and holds an Associate of Science degree in Computer Electronics Engineering from ITT.

Briceno's role leading the Quality Assurance department will be an important part of Triad's continued success, helping the company consistently meet customer expectations while strengthening compliance, quality performance, and continuous improvement across the organization.

Says Jose, "I'm excited about joining a custom design house where I can bring my experience in quality management into a manufacturing environment, working directly with customers and suppliers to fulfill their needs. Triad's experienced team services a wide range of industries, and I am looking forward to the opportunity to work alongside them as we build the future."

Outside of work, Briceno enjoys spending time with his wife and four children, with family barbecues and hiking trips among their favorite weekend activities. Briceno is also actively involved in the AYSO soccer program with his 11-year-old son, volunteering as both a referee and coach.

Briceno's approach to quality is reflected in one of his favorite quotes, attributed to Henry Ford: "Quality is doing the right thing when nobody is looking."

Triad Magnetics

For more than 80 years, Triad Magnetics has been a global leader in the design and manufacture of transformers, power supplies and inductors for a wide range of applications, including switch mode/high frequency, wall plug-in, power transformers, inductors and audio transformers. Triad's custom manufacturing facility in Perris, CA, offers a USA-based manufacturing option. In addition, most of Triad's standard products are produced in the Philippines, providing a low-tariff manufacturing and distribution channel.
